Programme Name: B.Tech Semester: VI Branch: Computer Science & Engg
Course Code: CSN16400 Course Name: Distributed Systems

Experiment No. 9

Experiment Description	
i)	Design a distributed application which consists of a server and client using threads using Java threads.
ii)	Design a and implement the following global schedulers for distributed application. <ul style="list-style-type: none">a. Suboptimal Heuristic Adaptive Centralized Dynamic Schedulerb. Mandatory Optimal One-Time Distributed Dynamic Scheduler
